**INSTRUCTORS:** John Mulhausen, PhD, CIH, CSP, 3M Company, St. Paul, MN  
Perry Logan, PhD, CIH, 3M Company, St. Paul, MN

**PDC TITLE:**

**“IMPROVING EXPOSURE DATA INTERPRETATION AND PROFESSIONAL JUDGMENT”**

**COURSE CONTENT:** An increased understanding of human decision-making processes and advances in statistical tools offer exciting opportunities for improving the accuracy, efficiency, and transparency of our exposure judgments. These tools can be used to formally combine our professional judgment regarding a particular exposure and its uncertainty along with the statistical analysis of current exposure data. The approach holds promise for expressing the output of exposure assessments in a manner that is much more easily understood and communicated than the output from more traditional approaches. Best of all, the decision analysis approach formalizes traditional exposure assessment processes already used by industrial hygienists today.

**COMMENTS ON COURSE:** This Mulhausen/Logan PDC has consistently been one of the most popular PDC offerings at AIHCE, and we are pleased to be able to offer it at a cost well below the conference rate. The two instructors for the PDC are nationally recognized experts in the field of exposure assessment and evaluation. This is a great opportunity to get a highly acclaimed PDC in our own home town, at a price that can't be beat. Hope to see you there.
